Hand Washing Policy

We actively promote hygienic behaviour at Laser, and we will try our utmost to stop the spread of infection wherever possible.

- We will have regular hand washing trips to toilets – supervised by group leader and group helpers.
- For the younger children – the group leader will show them how to wash hands properly. This is an easy way to integrate some fun into the proceedings. Hand washing games.
- All Laser children will be actively encouraged to wash their hands before eating lunch, before having a drink and after they have been to the toilet.
- Laser management will endeavour to make sure that there is a constant supply of hand wash in the washing areas.
- We will make sure, as much as is possible, that once the children have washed their hands they will then not move to an unclean area before touching their food.
